

THE ENERGY - SAVER

Cool Products Air and Water Purger type CPAWM

Special advantages

- Utilizes energy normally wasted in the air purger for combined water purging
- Very easy and cheap to mount on systems
- Only three connections: Wet suction, LP liquid and fouled gas line
- Nearly same cost to install CPAWM as only installing a CPAM
- CPAWM has a low total cost as installation cost is a considerable expense
- With air comes water CPAWM handles both problems
- Air and water purging goes hand in hand
- Very easy and cheap to operate, and service
- Gives you the perfect view of what happens in your system
- The perfect combined low cost energy saver

Cool Partners have developed an air and water purger, the CPAWM, that has proven to be highly efficient while being very simple to operate.
